

OGUIKE PASCHAL CHIDERA

Full Stack Web Developer

Remote, open to relocate | paschalogueike@gmail.com | +234 811 656 3757

SUMMARY

Full stack web developer with 2–3 years of experience designing, building, and shipping production web applications end to end. Comfortable owning a project from database schema to deployed UI, using Next.js, TypeScript, and PostgreSQL/Supabase. Also owns and operates an independent car sales business, building its entire digital platform from the ground up — bringing real product ownership and business instinct alongside technical skill.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js (App Router, Turbopack), Tailwind CSS, React Hook Form, Zod, TanStack Query, HTML5/CSS

Backend: Node.js, Next.js API Routes / Route Handlers, REST API design

Database & Cloud: PostgreSQL, Supabase (Auth, Storage, Realtime, Row-Level Security), Neon Postgres, Drizzle ORM

DevOps & Tools: Git/GitHub, Vercel, Turborepo, Railway

Soft Skills: Collaboration, Problem Solving, Product Thinking, Adaptability, Self-Directed Learning, Stakeholder Communication

PROJECTS

Owner & Developer — PZ Autos (Pazogu Automobiles)

Independent car sales business — designed, built, and run the entire digital operation

- Founded and personally operate an online car sales business, handling sourcing, sales, and marketing alongside all engineering.
- Designed and built the full marketing website with a public inventory showcase for car listings, photos, and details.
- Built a custom admin system for inventory and listing management, reusing and adapting the architecture from an earlier internal platform (Polanco Ops Hub).
- Own the full brand identity and product roadmap, including planned upgrades to the inventory and admin tooling.

Full Stack Developer — Polanco Ops Hub (for Polanco Exotic Cars)

Internal operations platform for a luxury car dealership, built and shipped independently

- Built an installable, mobile-first internal operations platform (PWA) that replaced WhatsApp- and Excel-based workflows for a luxury car dealership.
- Implemented real-time inventory management, a 6-stage lead pipeline with WhatsApp deep-linking, and staleness tracking using Supabase real-time subscriptions.
- Built an automated deal-sheet / proforma PDF generator that snapshots car data at time of sale for historical accuracy.
- Designed a Postgres schema with Row-Level Security and dedicated public-facing database views to securely expose a public inventory showcase without a separate backend service.
- Integrated the Twilio WhatsApp Business API and a live USD–NGN exchange rate feed into day-to-day dealership workflows.

Full Stack Developer — Independent Projects

Freight/logistics platform and a simulated trading platform, built to explore new domains and patterns

- Building a freight/logistics platform (Next.js, TypeScript, Drizzle ORM, Neon Postgres) spanning a public marketing site, customer portal, and admin app.
- Built Sterling Capital Exchange, a simulated multi-asset (spot, forex, options) trading platform demo, shipping core trading, wallet, and authentication features.

EXPERIENCE

Content Manager & Social Media Manager — Page Innovations, Lagos (6 months)

Videographer — Nigerian Film Industry (Nollywood)

Driver — Uber & Bolt (2 years)

EDUCATION

B.Sc. Business Management — Imo State University
